C#- 8/10		

Software:

Adobe Photoshop
Microsoft Visual Studio
Unity

Operating Systems:

Windows 10
Ubuntu 18.04

LANGUAGES

- English(Fluent)- Oral and written
- Cantonese(Proficient)- Oral

SPECIAL PROJECTS

C++:

Console RPG Game
Designed and maintained an RPG game that runs in the command prompt, simulating battles between user and monster.

Route Map
Designed and maintained a very simple GPS. With the help of a text file that the user creates, this program computes the fastest available route from user inputted origin to destination, connecting with adjacent cities.

HTML/CSS/JS:

Personal Blog Website
Developed and designed a personal blog. Created the whole frontend, backend and designed the whole website including a diary, poem tab and more about me.

SBUHacks 2019: "Piggy Bank"
A website to help manage expenses. Based on the user input, the program would calculate how many paychecks it would take to reach their goal, and how much money they can spend for every paycheck. My role was to design the website using HTML, CSS and Bootstrap on the front-end.

Color Converter: https://stannie-lim.github.io/index.html
Developed and maintained a color converter from RGB to Hex and vice versa. Allows previews of colors as the background of the website.

EXPERIENCE

Cold Stone Creamery | Staten Island, NY
Assistant Manager   **February 2017 – present**

- Prepare ice cream and cakes for customers
